

MTM – Low Income Multi Family program

Presentation to the EEAC

October 19, 2010

2010 Experience

- 1st year - Excellent feedback from participants
- Reported that need for gas LIMF buildings is greater than anticipated in 2009 planning
- LEAN reports pipeline of activity for 3 years based on existing budgets
- Finding the greatest need is replacing heating equipment/central boiler plants
- PAs committed to serve low income customers

2011 Objectives

- **COMPREHENSIVE** treatment of LIMF buildings
- Strategic selection of high use buildings
- Establishment of best practices, effective audit process
- Determine Project Life Cycle, impact with lead laws, added costs
- Increases in budgets to ensure whole building enhancements
